Entry Level Sales

Instructions

Prepare for the Interview:

In order to conduct an effective interview, appropriate preparation needs to take place. It is important to complete the following before interviewing an applicant:

- Become familiar with the competencies associated with the job and choose one or two questions from each competency to ask the
 interviewee.
- Review the candidate's application or resume and make note of any issues that you need to follow-up on. Some examples of potential issues are gaps in employment or working at a job for less than a year.

Greeting and Introduction:

Now you are ready to meet the applicant. When greeting the applicant introduce yourself and provide him/her some background information about yourself. Explain the purpose of the interview, for example, 'The purpose of the interview is to determine if there is a match between your interests and qualifications and the position.' Provide the interviewee with a brief overview of the interview structure so that he/she knows what to expect. Here are some tips for structuring the interview:

- Take notes. It will make it easier to evaluate the applicants afterward without forgetting the specific details.
- Tell the applicant that there will be time at the end of the interview for any questions that he/she may have.
- At the end of the interview tell the applicant about the company and the specific job that he/she is applying for.

Ask Competency-based Interview Questions:

Now you are ready to begin asking questions. Begin with questions that you have about the interviewee's application or resume. Ask questions about his/her previous work history or any potential issues that you noticed from the resume. When these are complete, transition into the structured part of the interview by asking questions associated with competencies for the job. Probe the applicant to give you a complete answer by asking Situation, Behavior, Outcome probes.

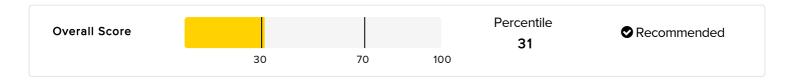

Bring the Interview to a Close:

When all of the questions are asked, you need to close the interview. Give the applicant specific details including the job duties, hours worked, compensation, and information about the company. Sell the position and company to the applicant by emphasizing job fit, sources for job satisfaction, and opportunities for growth. Finally, close the interview by thanking the candidate for his/her time and by giving him/her a timeline for the application process.

Rate the Applicant:

The last step is to evaluate the candidate. Some tips to help you complete a good evaluation are:

- Review your notes.
- Determine ratings for the applicant on each competency as well as an overall rating by using the anchor scales.
- Determine your final recommendation.
