Instructions

This guide provides interviewers with a standard set of questions that can be used to further evaluate important candidate competencies. Along with the interview questions, you will find instructions for how to best carry out the interview, question probes to help facilitate conversations, and a rating guide to help you score each response.

This report is confidential and its contents are intended to assist in the prediction of an applicant's work behavior. Please note that the assessment components included in this solution report are not weighted equally. Some of the components are broad measures of behavior and some are more narrow. Competencies denoted by an asterisk (*) are measures of narrow behaviors. While these behaviors are important to the overall score, they are not weighted as heavily when compared to other components in this solution. Our research indicates this weighting best predicts job performance. If you would like more information about this report (including scoring) or other products that SHL offers, please contact your account representative.

Prepare for the Interview:

In order to conduct an effective interview, appropriate preparation needs to take place. It is important to complete the following before interviewing an applicant:

- Become familiar with the competencies associated with the job and choose one or two questions from each competency to ask the interviewee.
- Review the candidate's application or resume and make note of any issues that you need to follow-up on. Some examples of potential issues are gaps in employment or working at a job for less than a year.

Greeting and Introduction:

Now you are ready to meet the applicant. When greeting the applicant, introduce yourself and provide him/her some background information about yourself. Explain the purpose of the interview, for example, 'The purpose of the interview is to determine if there is a match between your interests and qualifications and the position.' Provide the interviewee with a brief overview of the interview structure so that he/she knows what to expect. Here are some tips for structuring the interview:

- Take notes. It will make it easier to evaluate the applicants afterward without forgetting the specific details.
- Tell the applicant that there will be time at the end of the interview for any questions that he/she may have.
- At the end of the interview tell the applicant about the company and the specific job that he/she is applying for.

Ask Competency-based Interview Questions:

Now you are ready to begin asking questions. Begin with questions that you have about the interviewee's application or resume. Ask questions about his/her previous work history or any potential issues that you noticed from the resume. When these are complete, transition into the structured part of the interview by asking questions associated with competencies for the job. Probe the applicant to give you a complete answer by asking Situation, Behavior, Outcome probes.

Bring the Interview to a Close:

When all of the questions are asked, you need to close the interview. Give the applicant specific details including the job duties, hours worked, compensation, and information about the company. Sell the position and company to the applicant by emphasizing job fit, sources for job satisfaction, and opportunity for growth. Finally, close the interview by thanking the candidate for his/her time and by giving him/her a timeline for the application process.

Rate the Applicant:

The last step is to evaluate the candidate. Some tips to help you complete a good evaluation are:

- Review your notes.
- Determine ratings for the applicant on each competency as well as an overall rating by using the anchor scales.
- Determine your final recommendation.

Situation: What was the problem or issue?

Behavior: How did you analyze this information?

Outcome: Were you able to resolve the problem or issue based on your analysis?

<p>Below Average</p>	<p>1 2</p>	<p>Overlooked key pieces of information or clear connections; drew conclusions that were obvious, simplistic, or flawed.</p>
<p>Average</p>	<p>3</p>	<p>Identified and combined key information from a few sources; found important links, but failed to identify more complex, underlying connections.</p>
<p>Above Average</p>	<p>4 5</p>	<p>Drew clear conclusions by finding, analyzing and combining a great deal of complex information.</p>

Learns quickly*

This measures the extent to which the candidate picks up new information and techniques easily.

Tell me about a time you had to quickly find key points from a wealth of information in order to make a decision.

Situation: What was the decision you had to make?

Behavior: How did you find the key points from the irrelevant?

Outcome: Were you able to make a sound decision with the key points you found?

Tell me about a time you had to integrate new information in order to complete a project you had already started.

Situation: What project were you working on?

Behavior: How did you integrate this new information into what you already knew about the project?

Outcome: How did the new information you learned impact the outcome of the project?

<p>Below Average</p>	<p>1 2</p>	<p>Struggled to learn, integrate or use new information without help and repeated contact.</p>
<p>Average</p>	<p>3</p>	<p>Integrated and learned new information and techniques but only after some practice.</p>
<p>Above Average</p>	<p>4 5</p>	<p>Quickly found, learned and integrated key information, even with little to no practice with the new material.</p>

Works to high quality standards*

This measures the extent to which the candidate completes every task with a high degree of quality.

Give me an example of a situation when you had to define quality standards for a project.

Situation: How did you define quality standards?

Behavior: How did you ensure that the quality standards were met? What did you do when you noticed a violation of quality standards?

Outcome: How did defining quality standards help you achieve project objectives? Did you receive any feedback?

Tell me about a time when you had to compromise quality standards.

Situation: What was the situation? Why did you have to compromise the quality standards?

Behavior: What did you do to redress the issue?

Outcome: What was the result? What would you do differently next time to maintain high quality standards?

<p>Below Average</p>	<p>1 2</p>	<p>Did not recognize the importance of delivering quality work; was prepared to compromise standards.</p>
<p>Average</p>	<p>3</p>	<p>Was able to clearly define and deliver to quality standards.</p>
<p>Above Average</p>	<p>4 5</p>	<p>Was able to set high quality standards or address situations where standards had been compromised.</p>

Complies with rules and regulations*

This measures the extent to which the candidate adheres to rules, guidelines and procedures.

Tell me about a time at work where you have respected set rules or processes.

Situation: What was the situation you were in? What were the processes?

Behavior: What did you do to ensure you respected the set process?

Outcome: What was the outcome?

Describe a time when you have had to consider the implications of not following rules or regulations.

Situation: What action had you or your peers taken?

Behavior: What did you do after the action had been taken?

Outcome: How do you plan to learn from this situation?

Below Average	 	Viewed rules as guidelines rather than requirements.
Average		Adhered to rules consistently.
Above Average	 	Followed rules strictly; may have missed opportunities for increased efficiency.

Adapts to change*

This measures the extent to which the candidate accepts and adapts to changes without difficulty.

Describe how you have handled any big changes in your business area during the past year or so.

Situation: What was the situation? Did the changes affect your team structure?
